

## METAL STAIR PROFILE

### Specifications

Aluminium profile, silver tone. Available in 2 thicknesses :

- **NESTPSILVME25** = stair profile for floor with a thickness of 7 mm - 8 mm
- **NESTP9SILVME25** = stair profile for floor with a thickness of 9,5 mm

Length of 1 stair profile: 250 cm.

Available per piece.

### Installation instructions

Install the stair profile before installing the floor. Fix it to the underground with screws and plugs. Make sure you leave a sufficient expansion gap between laminate floor and stair profile.

Apply Quick-Step® One4All Glue to a laminate panel, then glue the panel against the stair riser. Slide the upper part of the plank into the stair profile.

Install the laminate panel of the next tread against the stair riser.
